Pittsburgh, January, 1888.

ANNOUNCEMENT.

All Locks and Latches in this catalogue are arranged in numerical order uniform with our price-list, and our price-list is divided off descriptively, thus enabling any one to find the kind of lock, description and price, with ease and facility.

Our regular line of Locks ends on page 107, and on pages 108, 109, 110 and 111 will be found a full description with the numbers of our *Burglar Proof Locks*, to which we call the especial attention of the trade.

Pages 139 to 147 contain the numbers, description, and illustrations of our *Rose Escutcheon Knobs* for inside doors. We were the first projectors of this kind of Escutcheon to be used for inside trimmings, and we now have many imitators.

We also refer the trade to our *Screwless Door Knobs* on page 124.

Lock numbers terminating with —

- | | | |
|----|------------|---------------------------------------|
| 1, | represents | Iron Bolts, Iron Key. |
| 2, | " | Iron Bolts, Brass Key. |
| 3, | " | Brass Bolts, Brass Key. |
| 6, | " | Iron Bolts, Nickel-Plated Steel Key. |
| 7, | " | Brass Bolts, Nickel-Plated Steel Key. |
| 8, | " | Iron Bolts, Brass Key. |
| 9, | " | Brass Bolts, Brass Key. |

When more than one tumbler is wanted add the following fractions to Lock number :

- | | | |
|---------------|------------|-------------|
| $\frac{1}{4}$ | represents | 2 Tumblers. |
| $\frac{1}{2}$ | " | 3 " |
| $\frac{3}{4}$ | " | 5 " |

STANDARD BURGLAR PROOF DOOR LOCKS.

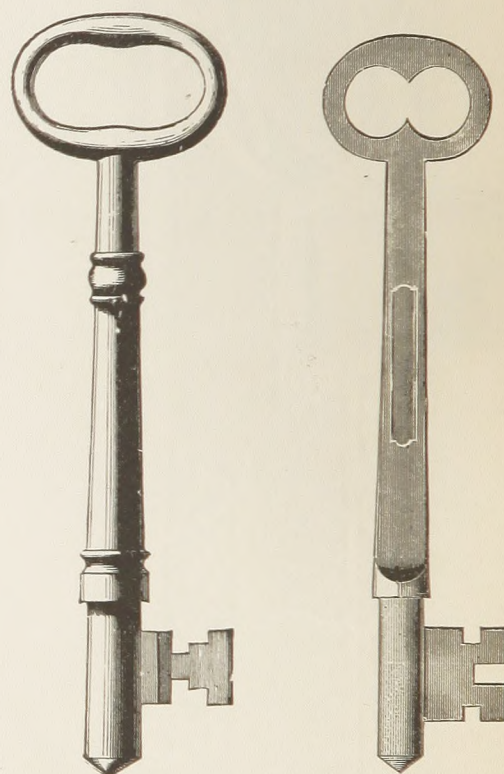

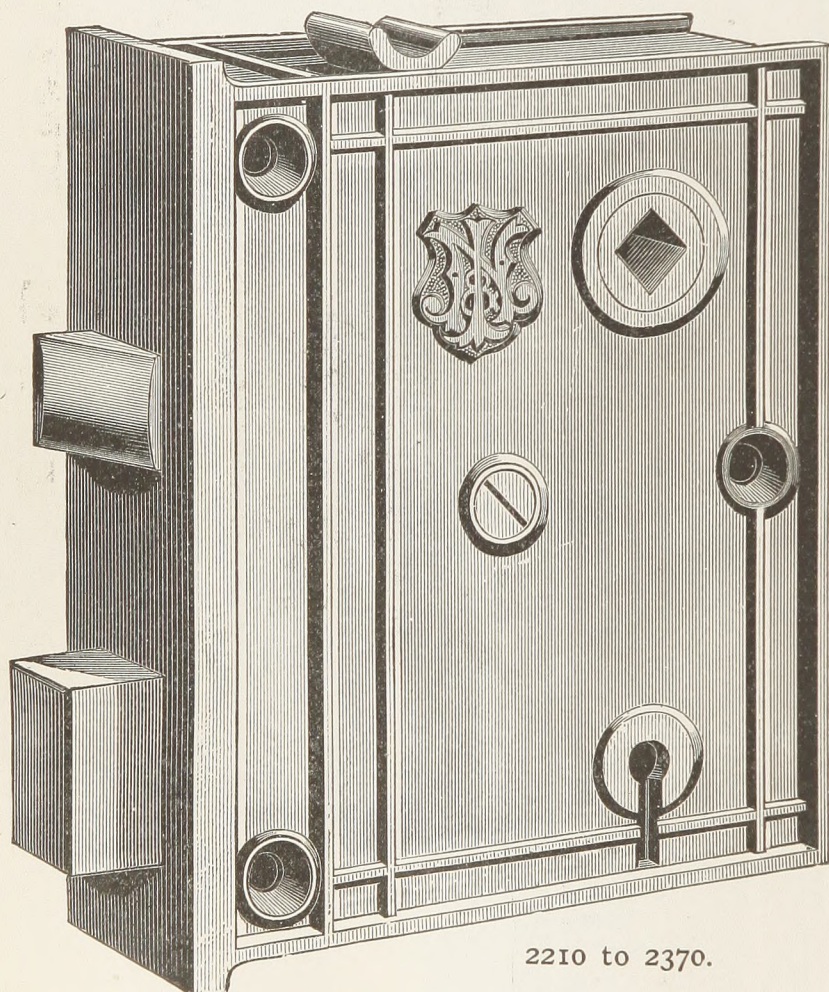

(RIM AND MORTISE.)

OUR BURGLAR PROOF LOCKS are the CHEAPEST and MOST RELIABLE in the Market. Their security consists simply in a cam, or stop, on the Rim, and a Thumb Turn on the Mortise Locks, which when adjusted after locking the Door on the inside prevents the Key from being turned or the bolt "picked" from the outside.

They are especially desirable for Bedroom, Kitchen and Side Entrance Doors, as all extra Bolts and Locks can be dispensed with.

These Locks are the same quality and description as our regular goods, and we designate them simply by adding "O" to the Lock number.

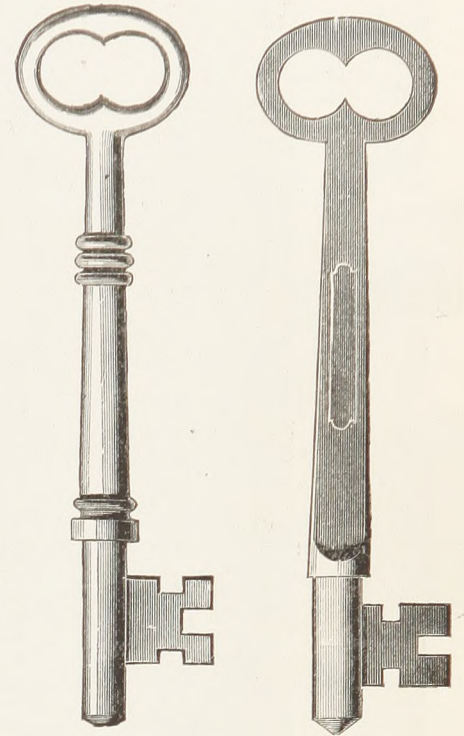

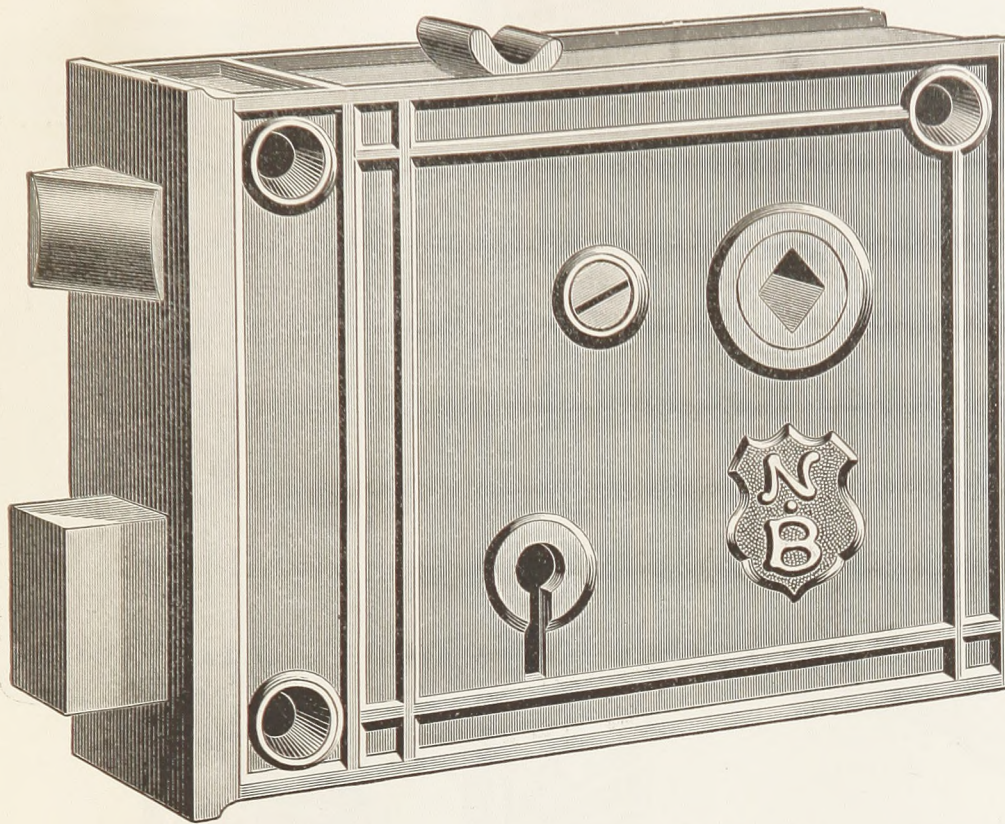

Below and on following pages will be found descriptions and illustrations.

2210 to 2370.

| NUMBERS. | SIZE. | UPRIGHT RIM LOCKS. | PRICE PER DOZEN. |
|----------|-------------|--|---------------------|
| 2210 | 4 1/4 inch. | Iron Bolts, Tinned Malleable Iron Key..... | |

MATHES' ADJUSTABLE SCREWLESS DOOR KNOBS.

8100½.

THIS INVENTION DOES AWAY WITH SCREWS IN THE NECK OF THE KNOBS.

After placing the spindle in the lock, the Knob is screwed on the spindle at A, and then adjusted to the thickness of the door by the thimble B, which enters into the rose C. The knob is then screwed up and held firmly in place by the steel lock-nut D, which fits into the thimble.

Of the Bronze and Iron Knobs one end is permanently fastened to the spindle.

We claim that this Knob is SUSCEPTIBLE OF THE MOST PERFECT ADJUSTMENT of any knob on the market.

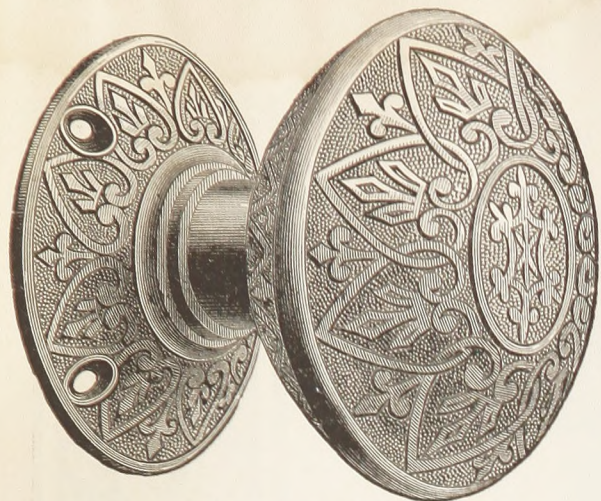

Any of our Bronze and Iron Knobs or Bronze Shank Knobs can be furnished screwless.

When Screwless Knobs are wanted add ½ to Knob number.

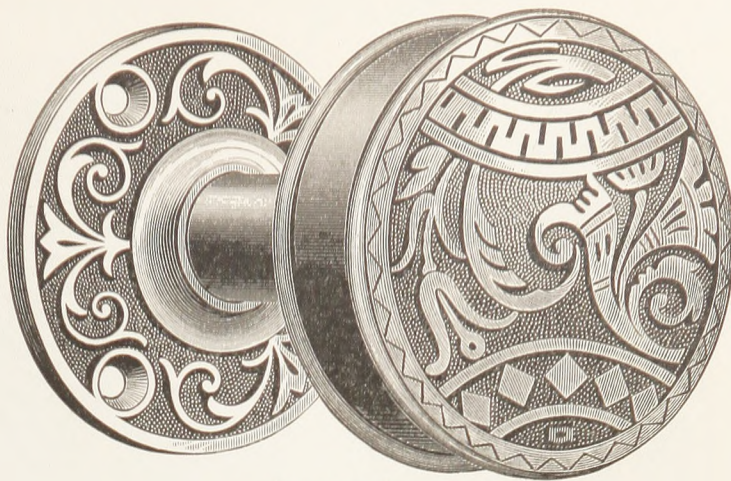

| | |
|---|--------|
| For Bronze Knobs, Screwless, add to list | \$1.50 |
| For Iron Knobs, Screwless, add to list..... | 1.00 |

When ordering give number of finish wanted.

MATHES' PATENT BURGLAR PROOF SASH LOCK.

This Sash Lock is absolutely Burglar Proof, and cannot be opened from the outside by the insertion of any instrument between the rails.

It binds the sashes firmly together, thus preventing the rattling of windows.

It is not liable to get out of order.

It is simple in contrivance and beautiful in design.

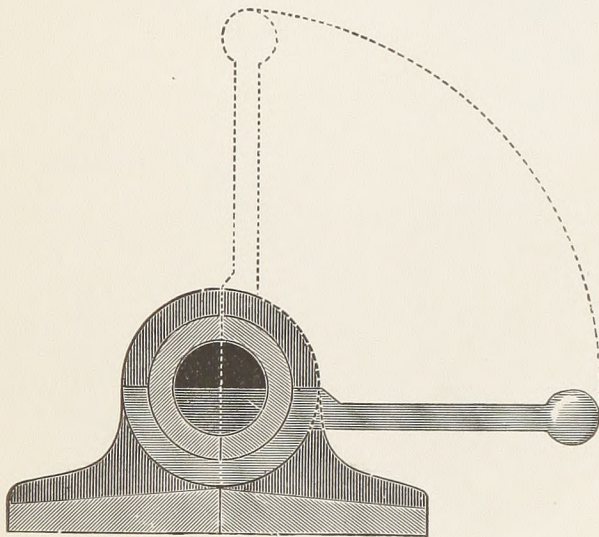

Figure 1.

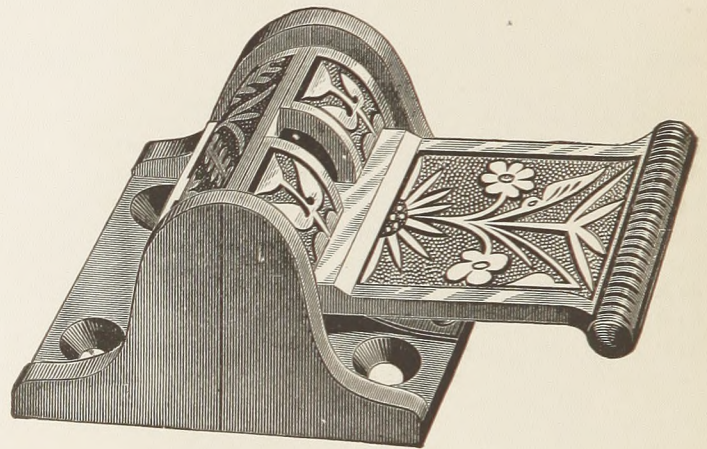

Figure 2.

Figure 1 is a sectional view of our Sash Lock, showing the operation of the lever from a vertical to a horizontal position.

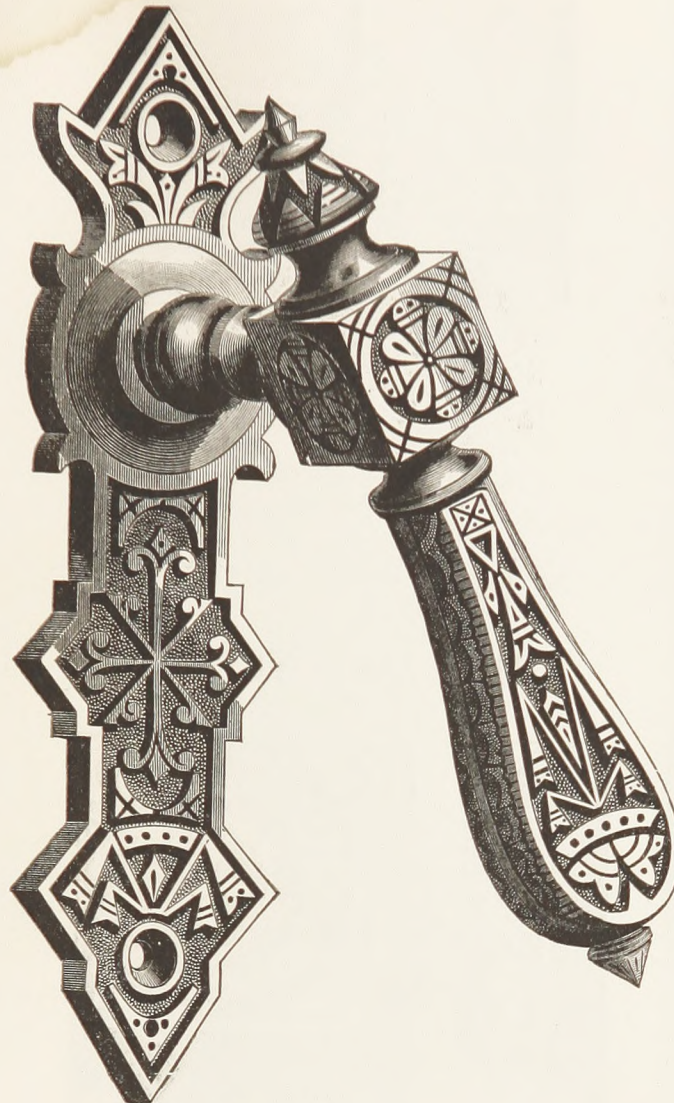

Figure 2 is a full view of the lock when closed.

BARN DOOR LOCKS.

MACK & REDWAY'S SELF-ACTING SLIDING DOOR CATCH AND LOCK COMBINED.

Only Sliding Door Catch operating without a Spring.

ADAPTED TO ALL HEAVY SLIDING DOORS, AND ADJUSTABLE TO ANY AND ALL THICKNESS OF DOORS.

Sunken handle for outside of Door.

The above cut shows inside of Lock and its simple construction. The turning of the key moves upper ward to a point over ward on lever, and thereby holds lever from being raised, which locks it. To open door from inside, raise lever.

HOUSE'S PATENT AUTOMATIC LIQUID DOOR CHECK AND SPRING.

IN POSITION ON THE DOOR.

SUPERIOR TO ALL OTHERS.

CAN BE APPLIED TO ANY DOOR.

CHECK ON JAM, DOOR OPEN.

This Check has absolute control over the Spring while door is closing, working oil instead of air to regulate the speed. The speed is automatically changed by the temperature closing quickly in cold weather.

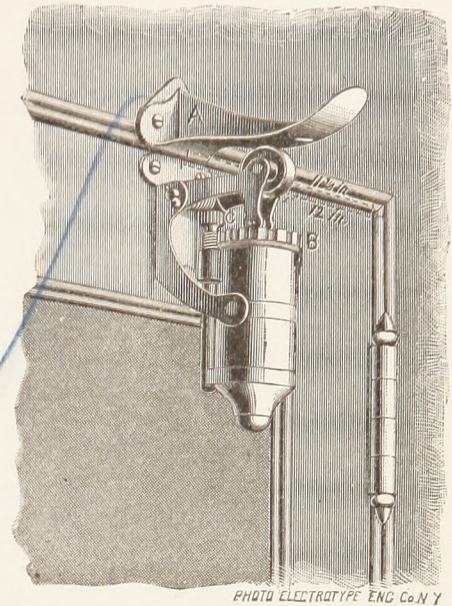

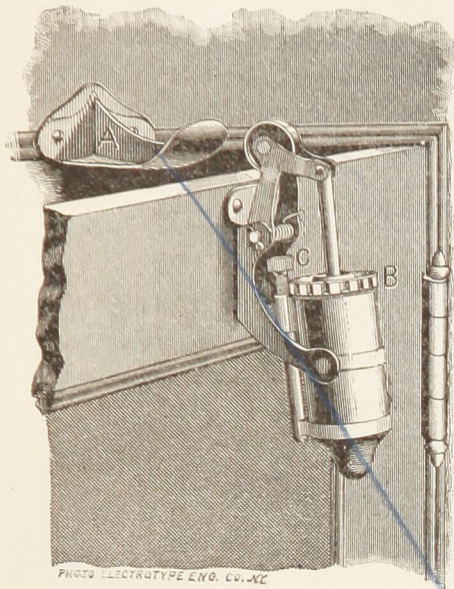

HAS NEVER FAILED TO GIVE SATISFACTION.

PRICE LIST:

| | | |
|--------|---------------------------------|--------------|
| No. 1. | Japanned, Nickel Mountings..... | \$5.50 each. |
| No. 2. | Full Nickered Mountings..... | 6.50 each. |
| No. 3. | Japanned, Bronze Mountings..... | 6.00 each. |
| No. 4. | Full Bronze Mountings..... | 7.50 each. |

Suitable for any door under 4 feet in width by 3 inches in thickness. For larger doors a stronger spring can be furnished.

HOUSE'S PATENT LIQUID DOOR CHECK.

These Checks are made especially for summer screen-doors, doors between dining-room and kitchen, bath-room, office, or any ordinary inside door, not exceeding 3 feet in width and $1\frac{1}{2}$ inches in thickness, and supplied with a spring or spring butts.

The Liquid Door Check allows the door to close quickly and without noise.

The Checks are made of steel and white metal, and are strong and durable. All working parts are submerged in oil, so there can be no wear. They will work on either right or left-hand doors. Requires no skill to apply or adjust them.

PRICE \$1.50 EACH.

❖ No. 1. ❖

BRITTAN, GRAHAM & MATHES'

NEW PRICE LIST

—OF—

DOOR LOCKS AND LATCHES,

Knobs ^{and} Builders' Hardware,

PADLOCKS AND SCALES.

—
PITTSBURGH, JANUARY, 1890.
